

Project COMMET: Work Package I. SPAIN.

Statistics on how EUROPASS Mobility has been implemented in Spain so far

Europass is available in Spain since Jan the 1st 2005.

In this country there is the Europass National Centre (*Centro Nacional de Europass*) and it is possible to fill Europass on line.

See next figure, which illustrate the web from which is possible to fill Europass on line. www.mepsyd.es

This web is updated by *Cedefop*, that is European Centre for the Development of Vocational Training (*Centro Europeo para el desarrollo de la Formación Profesional*)

Nowadays, the General Subdepartment of Vocational Training (*Subdirección General de Formación Profesional*) is the responsible of Europass in Spain.

From this General Subdepartment the information is that there is not Statistics available on usage of Europass Mobility in Spain.

The only information available is at an European Level:

- General Statistics: Europass 2007 statistics
- Report from the Commission to the European Parliament and the Council on the first evaluation of the Europass initiative

1) General Statistics: Europass 2007 statistics

They are available in the web since 01/02/2008 and they show a clear increase of the use of Europass:

- over 12,000 visits/day (2006: 8000);
- over 6 millions documents downloaded (2006: 3,700,000);
- over 1,450,000 CVs/ELPs completed online (2006: 789,000);
- ca 43,000 Europass Mobility documents issued (2005 + 2006: 51,000).

2) Report from the Commission to the European Parliament and the Council on the first evaluation of the Europass initiative

This document has been published in July the 4th 2008. It is very useful to read the final considerations. They confirm that the usage of Europass should increase in the level of Vocational Training. It also makes emphasis on the importance of learning by doing, that is, report knowledge from experiences, not only work experiences but also non profit activities that can provide skills to future employees.

Unfortunately, this report does not offer any statistics on usage, neither the implantation of Europass Mobility in Spain country.

The author of this report has asked several Private Companies about this tool. Eight companies never used this tool to send or receive employees. None of the asked companies have ever used this tool (So, 8 negative answers and 0 positive answers).

----- End of the report -----
